Granite Composite: _____ Fireclay: _____ Cast Iron: _____ Stainless Steel: _____

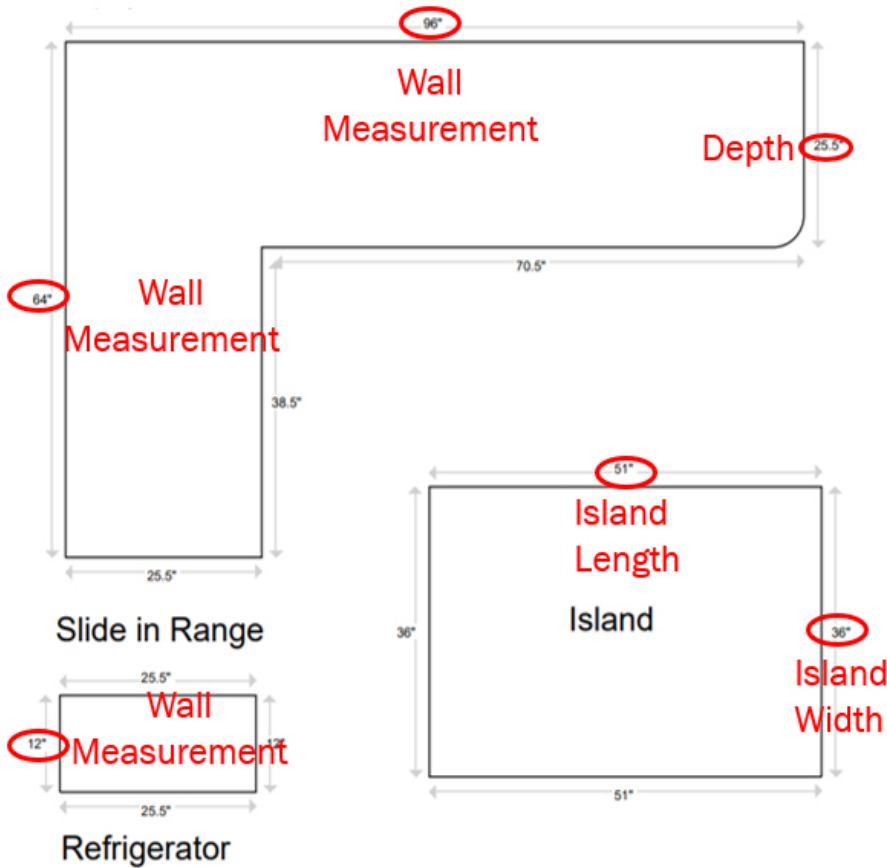

Please sketch your kitchen/bathroom layout below. It does not have to be to scale. In order to get a more accurate quote, feel free to attach pictures of the area in which the countertops will be going in. This will help us determine cost for tear out of existing counters (if applicable) and plywood installation if applicable. Please mark finished edges with an (X) and walls with (W).

How To Measure Your Countertops

1st: Draw the basic countertop shapes. Note that this does not need to be done to scale.

2nd: Write down the countertop measurements against the wall and also the depth along with any island or other measurements.

3rd: Write in the location of appliances such as the Refrigerator and Range

4th: Draw in any sinks and other items requiring cutouts such as a cooktop.

5th: Note the distance from the center of the cutout to the nearest edge of the countertop.
